ABOUT ME

I am a dedicated IT practitioner with a Master's degree in Computer Science and a well-rounded background in full-stack development, AI data engineering, gaming hardware, and healthcare ERP systems. I have actively contributed to startup environments by delivering end-to-end solutions that merge innovation with practical impact. Using tech to ease tasks and help lives is my true motivation. I also find great satisfaction by sharing knowledge, providing support, and likewise creating meaningful value for society. Continuous learning and also growth do remain as my commitment, and I strive for being up to date and adaptable within this field.

WORK EXPERIENCE

Alchedata AI Inc

Sacramento CA, USA

March 2025 - June 2025

Data Engineer

- Labeled and checked data such as images, text, and videos to make sure the annotations were accurate and high-quality.
- Reviewed and fixed any incorrect or unclear labels to keep the data clean and reliable.
- Flagged issues and shared feedback to help improve consistency in the annotations.

Logitech

Bengaluru, Karnataka

October 2024 - February 2025

Technical Assistance (Gaming Hardware)

- Conducted and optimized Logitech Gaming Software and GHUB software for gaming keyboards, mice, headsets, joysticks, PowerPlay, and simulator wheels.
- Provided technical support for gaming peripherals and software-related issues.

- Assisted customers with macro setup, software bugs, and firmware to enhance gaming performance.
- Diagnosed and resolved hardware and software compatibility issues across different gaming platforms.

Mobim Services Private Limited

Imphal, Manipur

July 2024- September 2024

Associate Software Development (Project- Ayushman Bharat Digital Mission)

- Developed a secure authentication process using an Aadhaar number, driving license, and mobile number to link and create ABHA (Ayushman Bharat Health Account) numbers.
- Designed and implemented a complete FHIR (fast healthcare interoperability resources) structure in compliance with HL7 standards for seamless health data exchange.
- Developed a real-time consent manager that includes consent artifacts to handle patient consent and data-sharing protocols.
- Working within the ABDM sandbox to test and deploy digital healthcare solutions.
- Technologies used: UIDAI, Sandbox, FHIR, Swagger, RSA, ECB, Postman, C#

INTERNSHIPS

Cognitel Training Services and IBM Business Partner

Gurugram, Haryana

Jan 2024- July 2024,

Full Stack Developer (Project - Career Connect)

- Developed a full-stack web application using MongoDB, Express.js, React, and Node.js.
- Implemented various filters to refine job and candidate searches based on criteria such as skills, experience, time, and location.
- Designed and implemented a responsive and modern user interface using Tailwind CSS for an enhanced user experience across devices.
- Integrated Google Maps API to enable geolocation-based job search and location-based filtering.
- Developed a chatbot feature to assist users with job searches, salary information, and related queries.
- Created an auto-resume maker tool that allows users to generate professional resumes automatically based on their input and predefined templates
- Technologies used: React, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase, Google Maps API, SweetAlert

Ekok Technocrat Private Limited

Guwahati, Assam

Jan 2024- June 2024

Junior Software Engineer (Project - Surveillance & Smart Attendance System)

- Developed a system that uses CCTV video and face recognition algorithms to track employee attendance automatically.
- Implemented real-time alerts to notify of unauthorized individuals

- Technologies used: Python, face recognition algorithm, Raspberry Pi, Camera module, Firebase, PyCharm.

EDUCATION

Educations	Institution	Year of Pass
Masters in Computer Application (MCA)	Assam Don Bosco University, Guwahati	July 2022 - August 2024

SKILL

Technical Skills	Programming	Framework/Library
Full Stack	JavaScript, PHP, Tailwind CSS	MERN, Django
Blockchain	Solidity	Hardhat, Truffle, Brownie, Remix
Cloud Computing		AWS, Azure, IBM Watson
ERP (HealthCare)	C#	HL7, FHIR, Firely
Cyber Security	Python	Wireshark, Scapy, Cryptography
Computer Network	Java	Cisco, Apache, Netty
Database Management	SQL	MongoDB, Firebase, Oracle, SQL Server
Familiar - Git, GitHub, Docker, PyCharm, Visual Studio Code, Postman, Zeplin, Hadoop, Sandbox		

CERTIFICATIONS

- Cyber Security (Cyber Vidyapeeth Foundation)
- Computer Application and Networking (NIELIT)
- Cloud Computing (NPTEL)
- CCC and DCA (NIELIT)
- Blockchain (NPTEL)
- Front End Technologies (IBM)
- 5G Technologies
- Artificial Intelligence (NPTEL)
- Database Management (NIELIT)

ACADEMIC PROJECTS

- Automatic Garbage Collection System, IOT (Arduino, Ultrasonic Sensor)
- North-East Traditional Food & Attire, Web-Application (Html, CSS, Php)
- Fair-Share , A Decentralized Microfinance Saving System (Ethereum, Solidity, Smart Contract)
